QUALITY POLICY

HVsalt Is Committed To Satisfying Its Customers With High-Quality Himalayan Salt Products On Time And Every Time. To fulfill this commitment, HVsalt has deployed both, Quality Control and Quality Assurance in its organizational structure.

Quality Control is looking after the overall process from the transportation of salt from mines to the factory, to the final product uploading into the container. Apart from this, Quality Control is also ensuring national & international environmental laws & policies.

On the other hand, in every department, Quality Assurance is responsible for step quality from rock salt cutting to final product packaging to ensure High-quality Himalayan salt products to the valuable clients of HVsalt.

Spreading the natural taste

We Are Committed To Continually Keep On Improving The Effectiveness Of Our Quality, Food Safety, And Halal Food Safety Management System.

Himalayan Edible Iodized Salt

Note

All Himalayan edible salt products from products codes HV-01 to HV-52 are available in 10~30 PPM and 30~60 PPM iodized form.

For 10~30 PPM iodized salt, add i1 and for 30~60 PPM iodized salt add i2 before the product code. For example: for getting a price quote for Himalayan dark pink salt 2~3 mm HV-27 with 10~30 PPM iodine, write i1HV-27 and for 30~60 PPM iodine, write i2HV-27 for the same.
